

EDUCATION

Sri Eshwar College of Engineering	B.E. CSE	CGPA 8.02 (Upto 3 rd sem)	2024-2028
Green Park International Sr.Sec.School (CBSE)	HSC	85.8%	2023-2024
Green Park International Sr.Sec.School (CBSE)	SSLC	89.2%	2021-2022

INTERNSHIPS

Isaii.AI- AI Developer

2025

Built an AI-powered placement preparation app that generates personalized MCQs from real aptitude and interview PDFs, tracks score history, and identifies weak areas using a Streamlit interface backed by Groq's LLaMA model and LangChain for context-aware question generation.

Tech Stack : Python | Streamlit | LangChain | Groq | PyPDF2

PROJECTS

SysWatch AI

2026

Built a production-ready **Multi-Agent observability system** that automates server monitoring, incident diagnosis, and risk prediction by analyzing logs and system metrics through a supervisor-driven agentic workflow.

- Implemented a LangGraph-based orchestration pipeline with dynamic task routing across specialized agents for log analysis, metric evaluation, root-cause identification, and predictive monitoring, enabling automated infrastructure troubleshooting and decision support.

Tech Stack : Python | LangGraph | LangChain | Groq LLM | LangSmith | Pydantic | Pytest

Policy-Compliance AI

2026

- Built an **Agentic RAG-based** contract compliance system that retrieves relevant policy sections and evaluates contract clauses to generate compliance verdicts, risk assessments, evidence citations, and compliant clause rewrites.
- Implemented a hybrid retrieval pipeline using semantic search, BM25 retrieval, cross-encoder reranking, parent-child retrieval, and LLM-based evidence extraction, orchestrated through a multi-agent LangGraph workflow with validation guardrails and automated review escalation.

Tech Stack : Python | LangChain | LangGraph | LLaMA 3.3-70B | ChromaDB | BM25 | ms-marco-MiniLM-L-6-v2 | Presidio

FMCG Sales Data Pipeline — Databricks Medallion Architecture

2026

- Built a **Databricks** lakehouse pipeline for an **FMCG** acquisition scenario, integrating parent (Atlon) and acquired (Sports Bar) sales datasets into a unified analytics platform by building a Automated data pipeline
- Implemented **Medallion Architecture** (Bronze–Silver–Gold) with **Delta Lake** and **Spark**, enabling scalable batch historical loads and incremental daily pipelines for efficient BI analytics and reporting.

Tech Stack : Python | Databricks | Apache Spark | SQL | Delta Lake | Amazon S3 | Genie AI

SKILLS

Languages : Python | C | C++ | HTML | CSS

Frameworks : FastAPI | LangChain | LangGraph | Scikit-Learn | Streamlit | Gradio | PyTorch | N8N

Libraries : Numpy | Pandas | Matplotlib | Seaborn

Tools/Platform : GitHub | GIT | Figma | Postman | Docker | langsmith | Gemini | Claude | HuggingFace | n8n | DataBricks | AWS

Big Data and Distributed Systems : Apache Spark | Apache Airflow | Astronomer cloud | PySpark

Database : Chroma DB | Pinecone | Faiss | Qdrant | MongoDB | MySQL | PostgreSQL

Core : DSA | OOP | Machine Learning | NLP | Deep Learning | Generative AI | Agentic-AI | MultiAgent architecture | Fine Tuning (Basics)

ACHIEVEMENTS

Cyber Security Hackathon 2025 - association with the SP Office, Namakkal & StartupTN - 1st Place

2025

Hack-N-ThonxAdya - Web development and AI automation Hackathon - 3rd price

2025

Leetcode - Solved 150+ | Max Rating: 1488 | Global Rank: 364,728

CERTIFICATIONS

Datascience , Machine Learning , Deep learning , NLP Boot camp - Krish Naik

2025

Complete Agentic AI Bootcamp With LangGraph and Langchain - Krish Naik

2025

Generative AI for Everyone - Andrew Ng

2025
